Analysis of Boron Uptake in a Xenograft Model using PGAA

Thursday 28 February 2013 10:10 (20 minutes)

Born determination in organic materials is one central issue in BNCT. In this work PGAA is validated for small samples.

Author: Mr SCHMITZ, Tobias (Institute for Nuclear Chemistry, Johannes Gutenberg-Universität, Mainz, Germany)

Co-authors: Mrs GRUNEWALD, Catrin (Institute for Nuclear Chemistry, Johannes Gutenberg-University, Mainz, Germany); Mrs IFFLAND, Dorothee (Institute for Nuclear Chemistry, Johannes Gutenberg-University, Mainz, Germany); Dr HAMPEL, Gabriele (Institute for Nuclear Chemistry, Johannes Gutenberg-University, Mainz, Germany); Dr MIEDERER, Matthias (Clinic and Policlinic of Nuclear Medicine, University Hospital, Mainz, Germany); KUDEJOVA, Petra

Presenter: Mr SCHMITZ, Tobias (Institute for Nuclear Chemistry, Johannes Gutenberg-Universität, Mainz, Germany)

Session Classification: Talks IV

Track Classification: SAAGAS 24
