

Dear PRESENTER, welcome to the joint poster session of the MLZ User Meeting and DN2020!

In order to start your room, please use the login data you received via email from the conference office! Please note: This link differs from the link the visiting participants use to enter your room! They find the proper link in the timetable at <https://indico.frm2.tum.de/event/225/sessions/499/#20201209>.

Presenters are offered to enter with camera. We think, it is nice to see somebody when entering the poster room - but please be free to disable the camera in the bottom menu. Visiting participants will join without camera on enter by default.

In case you like to visit another poster while presenting your own: You can open it in another tab. Please be aware that you can use your mic only once. Please mute yourself in all tabs you are not talking.

Let's have a look at the whole page first. You find detailed explanations on the next page.

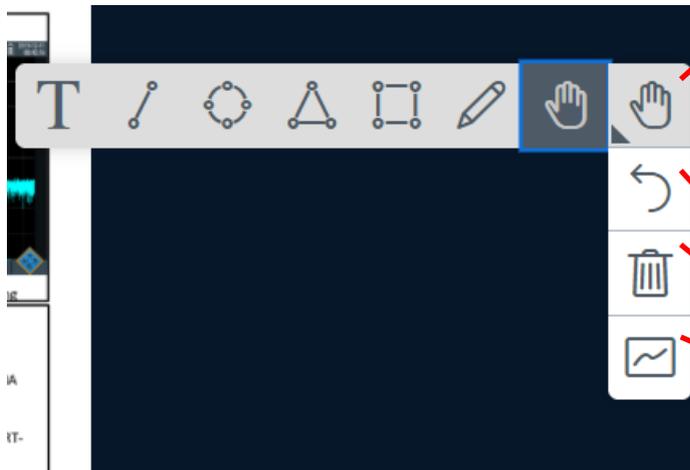

The view

The screenshot shows a Zoom meeting interface with a poster presentation titled "Stray current within the instrument MARIA investigation of the equipotential bus bar" from JÜLICH Forschungszentrum. The interface includes a chat window on the left, a user list, and a bottom control bar. Red circles and arrows highlight specific features:

- Public Chat:** A red circle around the "Public Chat" button in the chat window.
- Click to hide the chat:** A red circle around the "Public Chat" button in the chat window.
- Click to show the chat:** A red circle around the "Public Chat" button in the chat window.
- Click to hide/show the userlist:** A red circle around the user list icon in the top right of the meeting window.
- Click here for options (e.g. logout):** A red circle around the three-dot menu icon in the top right of the meeting window.
- More options:** A red circle around the three-dot menu icon in the bottom right of the meeting window.
- (interactive):** A red circle around the three-dot menu icon in the bottom right of the meeting window.
- Type here to chat:** A red circle around the text input field in the chat window.
- Click here to (de)mute your mic and turn on/ off your camera:** A red circle around the microphone and camera icons in the bottom control bar.

In order to show more of your poster, both side panels (chat as well as messages) can be moved or even hidden. This has to be done by you as the presenter as well as the visitor.

The details

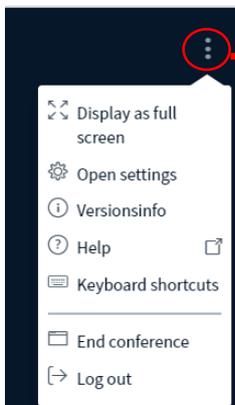

You can select the function to **write** some text, draw straight lines, ellipses, triangles or rectangles or to draw with a pen (free hand). You can select the pen color and size. You can use this also on the 3 empty pages (see below).

Undo the last operation

Delete all drawings

Start **multi user mode** so that others can draw also

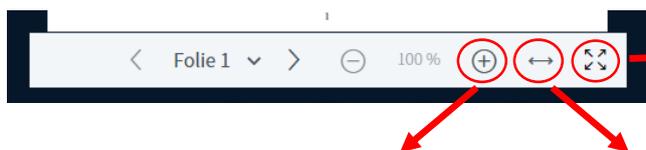

"Behind" your poster, there are **3 empty pages** you can use for explanations. Find them with the buttons on the lower side of the page. You can use the tools explained above.

When you click **the three dots on the upper right corner** inside the browser window, you get a menu with the following special functions (the rest are explained by the text itself):

- **End conference** – this will end the conference, disconnect all attendees and removes all uploaded files! You will only see this if you are the moderator of the session. In our poster sessions all presenters have the moderator status.
- **Log out** – this logs you out of the presentation but leaves the session open for others.

How to let your poster look great

If you like to **zoom** into your poster and show some details, just click here.

You like to show an **overview** of your poster? Just click here!

Just **fit in your poster in page width**. This is the best way. During your explanation you can just scroll down. In order to make your poster even bigger, you can also minimize your own picture or make the user list/ chat narrower.
