NICOS - Tipps and tricks

Wednesday, 9 December 2020 15:00 (3 hours)

NICOS is the standard user interface for the instrument control at the MLZ instruments. Because of the success and the user acceptance the ESS made the decision to used it as well for their instrument control. The SINQ at the PSI was also looking for a new instrument control software and found NICOS.

The webinar is splitted into two sections, a presentation about NICOS with the following topics:

- Introduction into NICOS
- Overview about the newest developments since the user meeting in 2019
- NICOS at SINQ
- New graphical user interface at ESS

and an interactive presentation of NICOS to show some tips and tricks for the users
