European Conference on Neutron Scattering 2023

Contribution ID: 89

Type: Talk (25 + 5 min)

Diffusive Dynamics of Bacterial Proteome as a Proxy of Cell Death

Monday 20 March 2023 11:00 (30 minutes)

Temperature variations have a big impact on the bacterial metabolism and death, yet an exhaustive molecular picture of these processes is still missing. For instance, whether the thermal death is determined by the deterioration of the whole or a specific part of the proteome is hotly debated. In our work, by monitoring the proteome dynamics of E. coli we show that only a minor fraction of the proteome unfolds at the cell death. First, we prove that the dynamical state of the E. coli proteome is an excellent proxy for the temperature dependent bacterial metabolism and death. The proteome diffusive dynamics peaks at about the bacterial optimal growth temperature, then a dramatic dynamical slowdown is observed which starts just below the cell's death temperature. Next, we show that this slowdown is caused by the unfolding of just a small fraction of proteins which establish an entangling inter-protein network—dominated by hydrophobic interactions— across the cytoplasm. Finally, we prove that the deduced progress of the proteome unfolding and its diffusive dynamics are both key to correctly reproduce the E. coli growth rate.

Authors: Dr DI BARI, Daniele (University of Perugia); Dr STERPONE, Fabio (Laboratoire de Biochimie Théorique (UPR 9080), CNRS); PETERS, Judith (Université Grenoble Alpes); Prof. PACIARONI, Alessandro (University of Perugia); Dr TIMR, Stepan (J. Heyrovský Institute of Physical Chemistry, Czech Academy of Sciences)

Co-authors: Prof. PETRILLO, Caterina (University of Perugia); Dr BECK, Christian (Institut Laue-Langevin, Grenoble, France); Dr MELCHIONNA, Simone (ISC-CNR, Dipartimento di Fisica, Università Sapienza); Dr SEYDEL, Tilo (Institut Laue-Langevin, Grenoble, France); Dr DERREUMAUX, Philippe (Laboratoire de Biochimie Théorique (UPR 9080), CNRS, Université de Paris Cité); Prof. GIUDICI-ORTICONI, Marie-Thérèse (Laboratoire de Bioénergétique et Ingénierie des Protéines, IMM, CNRS); Dr GUIRAL, Marianne (Laboratoire de Bioénergétique et Ingénierie des Protéines, IMM, CNRS)

Presenter: PETERS, Judith (Université Grenoble Alpes)

Session Classification: Proteins & Peptides seen by Neutrons

Track Classification: Health and Life Sciences
