Session Program

18-22 Jul 2016

MLZ Conference: Neutrons for Energy

Poster Session

Hotel Wyndham Grand Axelmannstein, Bad Reichenhall, Germany Salzburger Str. 2-6 83453 Bad Reichenhall

Tuesday 19 July

Crystal Structures and Thermoelectric Properties of A8Al8Si38 (A = K, Rb and Speaker Dr Volodymyr Baran Materials for nuclear fusion examined by neutrons: Neutron computed tomography on carbon fiber composites for plasma divertors Speaker Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Matauch		e r Session tion: Hotel Wyndham Grand Axelmannstein, Bad Reichenhall, Germany, Salzburger Str. 2-6 83453 Bad enhall
Dr Volodymyr Baran Materials for nuclear fusion examined by neutrons: Neutron computed tomography on carbon fiber composites for plasma divertors Speaker Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bemhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Cry	stal Structures and Thermoelectric Properties of A8Al8Si38 (A = K, Rb and (
Materials for nuclear fusion examined by neutrons: Neutron computed tomography on carbon fiber composites for plasma divertors Speaker Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch	Spe	aker
tomography on carbon fiber composites for plasma divertors Speaker Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Dr V	olodymyr Baran
tomography on carbon fiber composites for plasma divertors Speaker Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Mat	erials for nuclear fusion examined by neutrons: Neutron computed
Michael Schulz Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)		
Oxygen deficiency in High-Tc YBCO thin films identified by positron annihilation spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Mr Riele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
spectroscopy Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Mich	ael Schulz
Speaker Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Оху	gen deficiency in High-Tc YBCO thin films identified by positron annihilation
Dr Christoph Hugenschmidt The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	spe	ctroscopy
The GEMS-N Instrumental Suite and its Potential for the Characterization of Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
Energy Related Material Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Dr C	hristoph Hugenschmidt
Speaker Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	The	GEMS-N Instrumental Suite and its Potential for the Characterization of
Dr Jean-Francois Moulin Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Ene	rgy Related Material
Low dimensional lead bromide perovskite in light emitting application - investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
investigation on structure evolution via neutron scattering Speaker Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Dr Je	an-Francois Moulin
Mr Rui Wang Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)		
Neutron backscattering for high energy resolution spectroscopy on energy related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
related materials Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Mr R	ui Wang
Speaker Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Neu	tron backscattering for high energy resolution spectroscopy on energy
Mr Bernhard Frick - Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	rela	ted materials
- Photons for Energy - Complementary Analytics Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
Speaker Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Mr B	ernhard Frick
Armin Kriele MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	- Ph	otons for Energy - Complementary Analytics
MARIA - The high-intensity polarized neutron reflectometer of JCNS Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Spe	aker
Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	Arm	in Kriele
Speaker Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)	MAF	RIA - The high-intensity polarized neutron reflectometer of JCNS
Stefan Mattauch Strain Induced Martensitic Transformation in Austempered Ductile Iron (ADI)		
-	-	
-	<u> </u>	
Speaker		
Speaker Dr Michael Hofmann	Sno	aker

Speaker Dr Michael Monkenbusch

In-situ tensile deformation behaviour of a high ductile Mg-RE alloy via neutron diffraction

Speakers

Dr Weimin Gan, Dr Yuanding Huang

In-beam activation analysis facility at MLZ

Speaker

Zsolt Revay

SANS experiments on wood during pretreatment in ionic liquid/water mixtures

Speaker Dr Henrich Frielinghaus

Neutron Diffraction Studies of Catalytic GaN/ZnO Nanoparticles

Speaker

Dr Mikhail Feygenson

Structural complexity and O2- ordering in Pr2-xSrxNiO4+δ studied by single crystal neutron and x-ray diffraction

Speaker

Mr Rajesh Dutta

Neutron diffraction study of Li diffusion in Li1+xAlxTi2-x(PO4)3 solid state lithium conductors

Speaker Mykhailo Monchak

Determination of anodic transition metal deposition with PGAA

Speaker

Stefan Seidlmayer

Neutron scattering characterization of confined fluids for energy storage and environmental science

Speaker Dr Yuri Melnichenko

T-dependent structural studies of the oxygen ion conductor Pr1.5Sr0.5NiO4+d investigated by single crystal neutron diffraction

Speaker Mr Sumit Maity

Proton dynamics in high temperature polymer electrolyte fuel cell membranes

Speaker

Dr Reiner Zorn

Structural features and proton transport of polymer electrolyte membranes for high-temperature fuel cells

Speaker Dr Oxana Ivanova

Low-temperature performance of Li-ion batteries probed by high-resolution neutron diffraction and electrochemistry

Speaker

Anatoliy Senyshyn

Battery and materials research at the diffractometer STRESS-SPEC at FRM II

Speakers

Dr Michael Hofmann, Dr Weimin Gan

Pressure and temperature dependence of nuclear structure and magnetic properties in Mn4FeSi3

Speaker

Paul Hering

In-operando neutron reflectometry studies on Li incorporation and volume modification of silicon electrodes in Li-ion batteries

Speaker

Mr Bujar Jerliu

Study of magnetocaloric materials in the system Mn\$_{2-x}\$M\$_x\$Sb (M=Fe, Co)

Speaker

Mr Mamuka Chikovani

Lithium Permeation through Ultrathin Silicon Layers measured by Neutron Reflectometry

Speaker

Dr Erwin Hüger

Dynamic and Structure of Polymer-Cellulose Composite Electrolyte for Li-ion Battery

Speaker

Mr Pengfei Zhan

19:30

Thursday 21 July

16:10	Poster Session: Joint Poster Session MLZ/MML
17:30	Poster Session Location: Hotel Wyndham Grand Axelmannstein, Bad Reichenhall, Germany, Salzburger Str. 2-6 83453 Bad Reichenhall
