Every crystal matters

Tuesday, 15 March 2022 14:40 (20 minutes)

An efficient fragment screening pipeline was set up for a global player from pharmaceutical industry. 1000 crystals were prepared at NUVISAN ICB's high-throughput crystallography platform. Beamline P14 at EMBL Hamburg was chosen for data collection and MOLOX performed this service here. Data processing and structure determination was done by the client. More than 87% of the crystals yielded a dataset of sufficient quality for downstream analyses. Median resolution over all datasets was 1.84 Å.

Primary authors: BECKE, Christian (MOLOX GmbH); Dr VON MOELLER, Holger (MOLOX GmbH); Dr BOURENKOV, Gleb (EMBL Hamburg); Dr NIKOLOVA, Marina (EMBL Hamburg); Dr SCHAEFER, Martina (Nuvisan ICB); BUENO, Moises (EMBL Hamburg); Dr PANNEERSELVAM, Saravanan (EMBL Hamburg); Dr ZIMMERMANN, Sophie (MOLOX GmbH); Dr FIEDLER, Stefan (EMBL Hamburg); STEVENS, Tammo (Nuvisan ICB); Dr SCHNEIDER, Thomas R. (EMBL Hamburg); PALNATI, Vamsee Krishna (EMBL Hamburg)

Presenter: Dr VON MOELLER, Holger (MOLOX GmbH)

Session Classification: Biocrystallography: Drug Design

Track Classification: Main conference: Biologic Structure, Function, Reactivity, and Regulation
