## Real-time investigation of Lysozyme crystallization kinetics: a neutron diffraction study

*Tuesday, 15 March 2022 17:55 (1 minute)*

The isothermal crystallization kinetics of hen-egg-white Lysozyme has been investigated by means of a time-resolved neutron diffraction experiment for almost 3 days, starting from a supersaturated solution of Lysozyme until the growth of crystals. The analysis of the small angle neutron scattering curves from the Lysozyme solution reports on the number of dissolved lysozyme molecules.

**Primary authors:** LONGO, Marialucia (Jülich Centre for Neutron Science JCNS); HEIGL, Raimund; SCHRADER, Tobias

**Presenter:** SCHRADER, Tobias

**Session Classification:** Postersession

**Track Classification:** Main conference: Crystallization, Crystal Growth Processes, Synthesis
