Linking Diffraction Techniques with XRF and XAS Spectroscopy at the German CRG Beamline ROBL / ESRF

Wednesday, 16 March 2022 15:30 (20 minutes)

The recent upgrade of the Rossendorf Beamline [1] at ESRF allows simultaneous collection of diffraction (SCXRD and PXRD) and spectroscopy (XRF and XANES). We will present some recent results to demonstrate the experimental opportunities.

Primary authors: Dr HENNIG, Christoph (Helmholtz-Zentrum Dresden-Rossendorf, Rossendorf Beamline at ESRF); Dr SVITLYK, Volodymyr (Helmholtz-Zentrum Dresden-Rossendorf, Rossendorf Beamline)

Presenter: Dr HENNIG, Christoph (Helmholtz-Zentrum Dresden-Rossendorf, Rossendorf Beamline at ESRF)

Session Classification: Advanced Laboratory Sources and Beamlines

Track Classification: Main conference: Advances in Methods, Instrumentation and Data Analysis
