

DGK conference 2022

Wednesday, 16 March 2022

Crystallization and Crystal Growth Processes (09:00 - 10:40)

-Conveners: Petra Becker-Bohatý

time	[id] title	presenter
09:00	[89] Structural characterization and mechanism for crystal desolvation induced by polymer-assisted grinding	TERBAN, Maxwell
09:20	[136] Evolution of Dislocations in GaAs Wafers Investigated by Means of X-ray Diffraction Imaging	KABUKCUOGLU, Merve
09:40	[177] Lab-based correlative X-ray imaging to study core formation and its impact on lattice uniformity in (Mg,Zr):SrGa ₁₂ O ₁₉ single crystals	RICHTER, Carsten
10:00	[62] Solid form screening of pharmaceutical compounds enhanced by Electron Diffraction experiments	STAM, Danny
10:20	[28] Crystal structure variations and opto-electronic properties in alkali doped kesterite-type semiconductors	PRELL, Henrik
