

May 22nd to May 25th 2023 - Schloss Fürstenried, Munich

From medicine to the food industry, from the development of sustain-able and versatile materials to the implementation of artificial intelligence, biomaterials and their applications are constantly multiplying. That is why their characterization with neutrons is also a rapidly expanding field at the Heinz Maier-Leibnitz-Zentrum (MLZ).

Find detailed information on our website:

TOPICS

- Biomaterials for sustainability
- Peptides, polymers and gels
- Hybrid biomaterials
- Food

https://indico.frm2.tum.de/event/391

- Proteins
- Lipids and membranes
- Nanomedicine
- Biomimetics and alive systems
- Al for biomaterials

MLZ is a cooperation between:
