The JCNS polarized ^3He group

Tuesday, 5 December 2023 14:00 (3 hours)

Our group operates and/or develops in-situ ^3He polarizers/analyzers for the following instruments: MARIA, KWS1, KWS2, TOPAS, POLI (2x), DREAM (ESS), and TREX (ESS). We are also active in developing polarized neutron beam components and testing. We will present a summary of the status and performance of the various devices.

Primary authors: BABCOCK, Earl; SALHI, zahir (JCNS)

Presenters: BABCOCK, Earl; SALHI, zahir (JCNS)

Session Classification: Poster Session

Track Classification: Neutron Methods
