

IAEA Training Workshop: Advanced Use of Neutron Imaging for Research and Applications: AUNIRA

Contribution ID: 27

Type: Talk

ANTARES and other neutron imaging facilities

Monday, 28 August 2017 11:00 (45 minutes)

Michael Schulz, Heinz Maier-Leibnitz Zentrum (MLZ), Technical University of Munich, Germany

Email: michael.schulz@frm2.tum.de

Many neutron sources around the world provide at least some basic neutron imaging capability. However, only a relatively small number of professional state-of-the-art beamlines for neutron imaging exist at large scale facilities. These provide high collimation ratios combined with high neutron flux, which are prerequisites for many of the advanced neutron imaging techniques. An overview of the existing facilities will be given in this presentation and common features as well as differences will be discussed.
