

How can Sample Environment help

Tuesday 29 July 2025 19:00 (1h 30m)

We present an overview of the possibilities of the sample environment groups equipment at MLZ. Sample Environment can offer a wide range of parameters for measuring your samples. Low and high temperatures, magnetic fields, pressure, to name few, as well as combinations thereof. Feel free to prompt us with your special demands and we can discuss the different options.

Author: Dr WEBER, Alexander (Forschungszentrum Jülich GmbH)

Co-author: SUAREZ ANZORENA, Manuel (Forschungs-Neutronenquelle Heinz Maier-Leibnitz (FRM II))

Presenter: Dr WEBER, Alexander (Forschungszentrum Jülich GmbH)

Session Classification: Poster Session and Beer
