SAM and SHARPER, the outstation of the Laboratoire Léon Brillouin at the Institute Laue-Langevin

Wednesday 26 November 2025 16:00 (20 minutes)

In this talk, I will be presenting the two instruments managed by the LLB at the ILL, SAM and SHARPER, a small-angle neutron diffractometer and a cold time-of-flight spectrometer, respectively. The presentation includes a brief history of their installation, an overview of their current capabilities, some examples from recent users' experiments, and the planned upgrades for the near future.

Presenter: METILLI, Lorenzo (Laboratoire Léon Brillouin)

Session Classification: New facilities, new instruments III
